Sarah Lisle Photography

HEAD

More is less with the camera, so feel free to wear a little more make up than your normal daily routine.

TOP

Darker shades are slimming, but lighter shades help brighten your face. In either case, pick a color that enhances your natural coloring.

BOTTOMS

You want to make sure your pants are well tailored and not too tight or too loose. For men, the socks need to match the pants, not the shoes.

SHOES

If you want to wear heels, make sure to bring easy slip on shoes for walking to/from the session location.

ACCESSORIES

When planning accessories, think simple and timeless. They shouldn't distract from you or other subjects.

WEATHER

Nothing will make you feel more uncomfortable during your session than being too hot or too cold.
